# QC fashion tilt features recycled textile wastes

Manila Standard · 29 Apr 2025 · A4 · N. Araja Rio

THE Quezon City government has recognized the role of fashion in combatting textile waste. “In Quezon City, fashion isn’t just about style — it’s about shaping a greener future,” the local government unit said in a statement.

At least six standout designers have turned discarded textiles into dazzling children’s wear at the recent Retashow 2025: QC’s Catwalk to Sustainability, Quezon City’s flagship sustainable fashion competition held at Gateway Mall in Araneta City, Cubao.

Now in its second year, Retashow has challenged both aspiring and professional designers to reimagine waste as wearable art, showcasing the transformative power of creativity, innovation and environmental advocacy.
