Recycle plastic bottles When plastic bottles are recycled, they stay out of landfills and oceans, protecting wildlife and ecosystems

The Fiji Times · 16 May 2025 · 7 · By ANASEINI DIMATE

RECYCLING plastic bottles is important because it helps reduce environmental pollution, conserves natural resources, and lowers greenhouse gas emissions.

When plastic bottles are recycled, they stay out of landfills and oceans, protecting wildlife and ecosystems.

Recycling also saves energy and raw materials, as producing new plastic requires significant fossil fuels.

By recycling, we promote a cleaner, more sustainable environment and reduce the negative impact of plastic waste on the planet. It's a simple but effective way for individuals to contribute to a healthier and greener future.

According to recyclops.com, living a more sustainable lifestyle is important for those looking to reduce their carbon footprint and shrink the amount of plastic they throw away. There are plenty of ways that you can reduce the amount of plastic waste you produce and that is through recycling. Below are some of the ways you can recycle plastic bottles.

1) Reuse your plastic coffee creamer containers for snack storage:

Looking for a creative way to recycle your plastic coffee creamer bottles?Why not try filling the old containers with your favourite small snacks for the easy ability to pour! Snacks like nuts, small crackers, and candy are all great options and additionally, you won't have to worry about buying any expensive plastic containers for storage! 2) Make a plastic bottle planter: Follow these simple steps to get started; *Cut out the bottom third of a 2-liter bottle;

*Paint the bottle white or the color of your choice; and

*Fill the bottle with seeds and soil.

3) Start a herb garden with empty twolitre bottles:
If a small planter isn't your style why not upcycle your empty 2-litre bottles into a herb garden. You can follow these steps to create your own herb garden with six empty bottles.
*Remove the label from the bottle and clean the inside;
*Take a sharp object and poke drainage holes in the top third of the bottle;
*Poke a hole in the side of the bottle about halfway down;
*Wrap a piece of paper around the bottle; *Take a marker and trace a cutting line around the bottle;
*Cut along the bottle on the line; *Flip over the bottle top and insert a strip of fabric; and
*Make sure the fabric is in contact with the soil.
4) Make a beach bucket from laundry detergent containers:
Got a pileup of old laundry detergent bottles? Save them for your next trip to the beach by turning them into a new beach bucket! Simply cut the bottom third of the laundry detergent bottle to create the perfect scoop for your next sandcastle. This is also great as when you remove the label they stay colourful and bright so you won't ever forget it before your beach trip!
5) Reuse soda bottles by creating a vertical garden:
For those wanting to double down and create their own private vertical garden, this is perfect for you. Plastic bottles are perfect for those needing storage for a variety of plants both decorative and functional. This kind of vertical garden can be placed almost anywhere if you have some blank wall space that has access to sunlight and can be easily watered.
6) Reuse plastic bottles to make a DIY sprinkler:
Why not turn your old plastic bottle into a new way to water your garden or lawn? Most 2-L bottles can attach to the common end of an outdoor hose so it's easier than you think! All you have to do is Simply poke holes in a 2-litre bottle and you've made it happen. You can also recycle ballpoint pens that no longer work for a more effective sprinkler.
7) Create a piggy bank made from a reused plastic bottle:
Looking to save some money for your next special purchase? Why not turn your old plastic bottle into an upcycled piggy bank to store your change.
