## ECONEST tapped for garbage dumpsite

By MAR T. SUPNAD

ORANI, Bataan — The ECONEST, a sanitary landfill facility in nearby Hermosa town was tapped by two local government units for the dumping of their garbage.

Mayor Gene Malibiran-dela Fuente of Samal town and Mayor Efren Pascual of Orani town, tapped the help of ECONEST waste management corporation president, Atty. Beulah Coeli Fiel, an expert in waste management, to ad-

dress their growing problem of wastes as they agreed to dispose their towns' wastes in the latter's Sanitary Landfill Facility.

The setting up of the sanitary landfill facility in Hermosa town will save other neighboring towns from paying exorbitant fees in disposing of their garbage to the dumping sites in Tarlac.

Dela Fuente and Pascual had entered a memorandum of agreement with Fiel for their garbage disposal in ECONEST.

The mayor said the planned project "seeks to minimize the cost of garbage disposal, and has determined that the Hermosa Sanitary Landfill Facility, is the nearest, most viable and cost-efficient waste disposal facility to cater to the non-hazardous municipal solid waste disposal concerns of Samal."

For her part, Fiel said the agreement focuses mainly on the proper solid waste disposal of their towns to her Hermosa Sanitary Landfill Facility.
