

# Converge ICT targets SMEs for fiber internet

The Philippine Star · 17 Jun 2018 · By LOUELLA DESIDERIO

Converge ICT Solutions Inc. is targeting small businesses for its new fiber internet offering designed for enterprises looking to upgrade to the next level.

In a statement, Converge ICT said Converge Microbiz, a new premium fiber internet offering, is designed to upgrade businesses.

“In an all-digital era, the ability to efficiently connect, process and work online is as vital as they come. That is where a constantly reliable and consistently fast internet connection is the answer. And the answer for your small business is Converge MicroBiz,” Converge ICT said.

Running on pure end-to-end fiber internet, the offering gives small businesses premium service quality. Converge Microbiz plans start at P2,000, providing up to 25Mbps with no data cap.

Businesses can also opt for a higher plan which provides speeds of up to 50 Mbps, at a monthly service fee of P3,000.

Both plans have an installation fee of P2,500, lock-in period of 24 months, and a guarantee of 30 percent minimum speed at 80 percent service reliability.

“Considering that entrepreneurs’ time are so valuable, having a dependable internet connection allows them to focus more on productive tasks rather than waste time with lags that has been the status quo for other providers,” Converge ICT said.

Converge ICT is engaged in providing fiber internet and digital consumer-centric services in the country.

Its products and services run through the first pure end-to-end fiber internet network in the country.
