

QC partners with Eton for fast vaccine rollouts

The Philippine Star · 23 May 2021 · B4 · By IRIS GONZALES

The local government of Quezon City has partnered with Eton Properties Philippines for a more accelerated vaccine rollout.

Eton transformed its event venue, Centris Elements inside the BPO-IT lifestyle hub, Eton Centris, along EDSA, as a vaccination center.

Around 1,800 Quezon City residents who are medical front liners, seniors and those with co-morbidities were inoculated with the AstraZeneca vaccine in Eton Centris.

Quezon City Vice Mayor Gian Sotto said the private sector partnership bodes well for the LGU's goal of achieving 100 percent vaccination.

Sotto said the location of Eton Centris, at the corner of EDSA and Quezon Avenue, is strategic and accessible to all citizens.

"Having Eton as one of our private partners will help us in reaching our goal to protect all our Quezon City citizens. With Centris Elements' strategic location, the vaccination site became more accessible to everyone, which in return made it easier for us in the LGU to accomplish our goal of 100 percent QC ProtekTODO," Sotto said.

Eton Properties COO Karlu Tan Say said the partnership puts the country a step closer to normalcy.

"It's important for us in the private sector to work together with the local government for the welfare of our immediate community and for the economy as well. Working with the LGU will bring us one step closer to normalcy and economic growth," she said.

Centris Elements is a 2,000 square meters events venue that catered to social and corporate functions pre-pandemic.

Eton Properties is the property arm of LT Group Inc., the listed holding company of taipan Lucio Tan.
