Supercharge your immune system

Whanganui Midweek · 2 Mar 2022 · 11

Your immune system needs to work hard all year round to keep you healthy.

A healthy immune system creates barriers that stops invaders (called antigens) entering your body, compromising your health, and making you sick. If antigens through, your immune system produces white blood cells and proteins that attack and destroy them. To effectively ward them off, your immune function must be strong.

HealthZone Viral Zone, Immune Zone, and Vitamin C Zone provide vital support to your body's immune defences.

Viral Zone contains Pau D'Arco which is known to nourish your body's defence system, helping your body to protect its self against pathogenic organisms and assisting in elimination of waste. Viral Zone is anti-parasitic, anti-fungal, antimicrobial, anti-inflammatory and anti-viral. It can be used as a preventative measure against bugs to avoid getting them in the first place.

HealthZone Immune Zone provides synergistic support for your immune system. It provides nutrients that are targeted towards supporting your body's natural immune defences and maintaining your DNA integrity. Immune Zone supports immunity, bone health, energy, an on-the-go lifestyle, and general wellbeing.

HealthZone Vitamin C Zone is a balanced and complete vitamin C complex with bioflavonoids, a group of important antioxidants that help maximise the benefits of vitamin C by slowing its breakdown in the body.

Always read the label and take as directed. If symptoms persist, consult your healthcare professional. HealthZone Limited, Rukuhia. TAPS PP7200.
