GSIS hosts Project Hub yearend meet

The Manila Times · 1 Jan 2025 · B4

THE Government Service Insurance System (GSIS) hosted a quadripartite meeting on Dec. 18, bringing together officials from the Department of Transportation (DOTr), Metropolitan Manila Development Authority and the Quezon City local government unit to discuss milestones reached toward the realization of the Project Hub proposal, including the next steps for the coming year 2025.

Project Hub is the proposed intermodal transport facility expected to rise on a 3-hectare GSIS property in
Quezon City by 2026. It is a directive from President Ferdinand Marcos Jr.

The meeting highlighted the collaborative efforts of four government entities to ease traffic concerns, enhance mobility, and support economic development in Quezon City and nearby areas.

The agenda included updates on the Project HUB's Terms of Reference from the DOTr and exchanges among stakeholders to refine the project's details to include the immediate operation of a temporary transport facility by next year.

The meeting concluded with all parties reaffirming their commitment to advancing the project as
it aligns with the administration's vision of sustainable and innovative infrastructure solutions.
